The feeling of optimism in administration circles was heightened today by the signing of treaties between the United States, Great Britain, France, Spain and China, which it is believed "will make armed conflict between the United States and these nations almost, if not entirely, impossible."

The treaties provide that all disputes which cannot be settled by diplomacy shall be submitted to a permanent commission for investigation for one year.

Similar in principle to the twenty-two treaties signed with Central and South America and a few European countries, nineteen of which have been ratified by the Senate, the four pacts signed today are regarded by officials and diplomats here as the most advanced step which the American government has taken to forward the cause of peace.

Immediately after the conventions were signed Secretary Bryan dispatched telegrams to the American government has taken to forward the cause of peace.

ONDON, Sept. 16, 3:30 a.m.-A dispatch to the Reuter Telegram Company from Berlin, coming by way of Amsterdam, gives the following statement of the German headquarters staff, timed 9 p.m. Tuesday evening:

"The battle which has been continuing for the last two days on the right wing of our western army extends today to the eastern armies in the neighborhood of Verdun.

"Until now the Germans have been partly successful in some parts of the extended battlefield. A general battle is still continuing.

"In the eastern war theater the army of Gen. Hindenburg is now reforming after the conclusion of his pursuit. Rumors that upper Silesia is about to be threatened are unfounded."

"Both armies are now taking breath," says the Dally Mail's Bordeaux correspondent. "If the Germans are able to take a strong position north of the River Aisne, another battle is likely at the end of the week." "Evidences of their defeat accumulate. Masses of every kind of material are being abandoned by the Germans, pointing to the continuance of their retirement. The French are bringing up reinforcements in large numbers." Explaining the recent confusing movements of the German forces in Belgium, the Ostend correspondent of the Times says he learns that in addition to the German force moving to the Belgian attack and which was compelled to turn north again, there was a second German army corps moving south in the track of the other corps. Sixteen of the dead have been identified. Eighteen persons were in-jured, ten of them seriously. Ninety-

hurt. The four sleeping cars remained on the track.

Many of the victims were drowned apparently while they sleept. Others clambered through the windows of the submerged cars and swam to safety. A nurse, Miss Nona Campbell of St. Louis, climbed to the upturned side of the chair car and rescued five imprisoned passengers by pulling them through the windows.

Traffic was tied up until late this afternoon and the first train from the west to pass the scene after the disaster did not reach St. Louis until tonight.

jured, ten of them seriously. Ninetynine persons, including the crew, were on the train.

The accident occurred at a curve which marked the edge of a ravine characteristic of the Ozark hill country. For several hours the train had been going carefully, as the engineer feared the heavy rains had weakened the track. Just as the engine hit the curve two miles from Lebanon, Engineer O'Brien saw a cloudburst, seemingly a wall of water ahead of him. Though the train was going only fifteen miles an hour, he closed the throttle, but before the train could be brought to a stop the water struck it.

BANK SWEPT AWAY.

The twelve-foot embankment on which the track crossed the ravine was swept away, the chair car and smoker toppled over into the ravine. The engine and mail and baggage cars had crossed the deepest part of the ravine, and though they were pulled from the rails and toppled over, they did not fall into the water. The engine and was killed, however, apparently having been crushed. The engineer escaped. None of the mail clerks or express messengers was aminer here tomorrow.

Fighting Disease Germs!

There is a popular idea that most sickness is caused by a germ of the disease finding entrance to our bodies through the food we eat, the water or nilk we drink or the air we breathe.

through the food we eat, the water or milk we drink or the air we breathe. This is true as far as it goes, but it is also true that disease germs are entering our bodies every day without causing disease.

The reason for this is that there are forces within the body that are constantly fighting these disease germs and it is only when this defense is weakened that the germs get the upper hand and we become ill. One of the most powerful of these-forces that work for health is rich, red blood. Good, healthy blood increases the resistance of the body to the diseases that are always threatening. It is easier to keep up this resistance by taking Dr. Williams' Pink Pills, eating proper food, avoiding articles of food that do not agree with us and getting plenty of fresh air day and night, than it is to cure disease after it gets a foothold. Keep up the resistance of your body to disease by these tonic pills, which you can get at any drug store, and you will avoid much sickness.

Two booklets "Building Up the Blood" and "What to Eat and How to Eat," will be sent free by the Dr. Williams Medicine Co., Schenectady, N.Y. Eat," will be sent free by the Dr. Wil-liams Medicine Co., Schenectady, N.Y.

P. O. Box 305, Berkeley, Calif.—"My hair was dry and falling out and my scalp scaly. At times there were pimples on my scalp. The pimples were small and red, would fester, dry and itch. My hair would grow a certain length and break off and fall out. The falling out was always preceded by the breaking out of the pimples and itching. Dandruff scaled off my scalp and could be seen in my hair.

"I tried ——— for some time but when I stopped its use my hair had the same dry brownish color, and the scalp was not healed. Then I covered the scalp was not healed. Then I covered the scalp was not healed. Then I covered the scalp with giverine but the hair condition remained the same. I saw Cuticura Soap and Ointment advertised in the newspaper so I swote asking for a free sample. I applied the Ointment and let it remain over night. In the morning I washed the scalp thoroughly with Cuticura Soap and water. I then bought some Cuticura Soap and Ointment from my druggist. I treated my scalp for nine months. Now the scaly crust and pimples are gone and I have a new growth of thick, dry, brown hair." (Signed) Mrs. E. K. McIlvaine, Apr. 8, 1014. MEDIATOR URGES WILSON'S PLAN.

'Suicide" to Reject It, Union Coal Miners Are Told.

Proposal Called Best Men Can Hope to Obtain.

Cost to Organization Said to Be Three Millions.

TRINIDAD (Colo.) Sept. 15.—The United States government and the international organization of the United Mine Workers of America today united in a plea to the striking coal min-ers of Colorado to accept the peace plan drawn up by a board of Federal mediators and indorsed by President Wilson. 'The miners' convention ad ourned until tomorrow without reach-

ing a vote.

Following an address by Frank Hayes, vice-president of the union, ad-Hayes, vice-president of the union, advocating adoption of the proposal on behalf of the fitternational officers, William R. Fairley, one of the two mediators appointed by the Secretary of Labor, told the delegates that it would be "suicide" for them to reject the recognition.

proposition.

"Are you going to put the President of the United States in a position where he will be ridiculed by capitalists all over the country?" be demanded.

"I don't believe you are going to commit suicide," the Federal mediator added. "I believe you're going to accept this proposition. If the Federal troops leave while the strike is unsettled, God only knows what will happen." Hayes in his speech told the dele-gates that the union had spent \$3,044,-000 upon the strike. He urged the ac-ceptance of the President's proposal-

able and a decided improvement over conditions before the strike.

In the course of Fairier's speech Mary Jones created a diversion by declaring she saw a "Colorado Fuel and Iron Company spotter" in the hall, "taking notes for the C. F. & I."

"Throw him out by the neck," she shouted.

The "spotter" proved to be a re-porter for a Trinidad newspaper con-ducted by the United Mine Workers of America.

WILSON HEARS

OF ACTION.

(SY A P. DAY WIRE | WASHINGTON, Sept. 15.—Presi-ent Wilson was notified today that the United Mine Workers of America had accepted the tentative basis for the settlement of the Colorado strike submitted by the President last week. In a letter to the President last week. In a letter to the President workers said their acceptance of the settlement plan, of course, was conditional upon the action of the convention of the Colorado branch of the organization meeting at Trinidad today.

The heads of the mine companies involved in the strike have notified the President that they have received and are carefully considering the tentative agreement sent to both parties to the controversy last week. the United Mine Workers of America

EXPECT MINERS

WILL APPROVE.

INDIANAPOLIS, Sept. 15.—The roposition of President Wilson for officials of the United Mine Workers of America in a letter sent to the President and made public today. The acceptance, however, is subject to the approval of the Colorado miners who met today in Trinidad to take action on the proposal. William Green, international secretary-treasurer of the miners, said he believed the Colorado miners would sanction the settlement. The terms accepted by the miners and also placed before the Colorado operators in a letter to President Wellborn of the Colorado Fuel and Iron Company by President Wilson, provide, in brief, as follows:

A three-year truce; the appointment of a grievance committee by the President, open-shop conditions; re-emissions.

TO POISON TROOPS.

BUTTE (Mont.) Sept. 15.—An alleged plan to poison the drinking water of the 700 members of the National Guard now on duty here was discovered today when Fred Magnar-dot was arrested on order of Provost Marshal Frank Conley, Magnardot was taken before Judge-Advocate Roote,

taken before Judge-Advocate Roots, where he was charged with advising another person to place poison in the water pipes at the Courthouse where the militia is in camp.

Magnardot, a plumber's helper, and several other workmen were repairing the pipes, according to the authorities, when Magnardot advised one of the men to place poison in the pipes. The suggestion was spurned and the officer notified.

[LOCAL CORRESPONDENCE] CHINO, Sept. 15.—Buggy tracks and hoofprints and a trail of blood led and hoofprints and a trail of blood led
a Canstable to arrest Jesus Ferro at
Almanza's camp, near here. Monday,
on a charge of having stolen a pig.
Circumstantial evidence of the strongest apparent character was worked up,
then Ferro was released when he told
a story that bids fair to clean his
hands of the porker's blood.

The traces led from a pig pen here
to Ferro's home. The hog, neatly
butchered, was found under a table
there. Hoofprints that the Constable
had followed exactly fit those of Ferro's horse.

Yet Ferro declared that a stranger
called at his house and offered to sell
him a buggy. Ferro said he agreed and
the stranger departed, later returning with the porker.

Ferro was released and asked to

tent forelady is in charge of the workers and all the sewing is required to be up to standard.

The United Charities make no money from the room—in fact, it is run at a slight loss. All the proceeds go to pay the workers the wage named and for the rental of sewing machines. The beneficiaries are to be Los Angeles people only. The definition of a "handicapped woman" is one without means of support and prevented by age or physical disablitity from doing commercial work.

Miss Isabelle Simeral, superintendent of the United Charities, says that if the sewing-rooms are successful some similar work will be devised for men—probably a wood-yard or workshop.

Issues Fought to a Finish by Salvationists.

Impassioned Plea for Their Life as Organization.

The bitter issues between the Sal-vation Army and the Municipal Charities Commission were fought to a fin-ish before Presiding Judge Wood yes-terday, former Judge Gibson, for the Attorney Bearman and A. J. Copp,

des Commission.

In taking the matter under submission, Judge Wood intimated that he ould decide in favor of the commission, unless he found something in the authorities to change his opinion, hich in effect was that the city has the right to regulate charlities.

The Salvation Army alleges that the ordinance under which the commission held that the ordinance, nown as the begging ordinance, is asonable and unconstitutional. The minister is an expectation of the city, which is police powers of the city. Mr. timell argued that a charity as despread as the Salvation Army as despread as the Salvation Army colute against imposters and grafter and the commission has no line the money the Salvation Army colute as the city that the coluting they get from public.

ask the Board of Supervisors this afternoon to perfect the organization of the Committee on Flood Control.

Since the mass meeting in Blanchard Hall last June, attended by representatives of all the municipalities, civic and commercial organizations of the county of any consequence, nothing further has been done, it is said to carry out the recommendations of the five engineers. They, at the request of the Supervisors, made recommendations for flood control after an exhaustive study of the situation. The work approved by these engineers will cost between \$10,000,000 and \$11,000,000.

Mr. Carter will urge the Supervisors to appoint a committee to work in conjunction with the engineers who formulated the control plans. On account of the sediment that was carried into the harbor last winter, the Wilmington Chamber of Commerce is extremely anxious that preventive measures be taken at once.

A Special Study of the Latest Dance Records

We have made a special study of records for dancing purposes. The very best expert opinion is represented in the numbers which we suggest. If you will tell us the precise use to which a dancing record is to be put, whether it is to be used in an apartment or in a ballroom, whether by young folks desiring to practice the latest and most difficult steps or by their elders who are comparatively novices, we will be able to put you in touch with precisely the music you should have. The Victrola furnishes the most delightful music for dancing the world has known. It is neither too loud nor too soft, and, of course, it goes without saying that the time is as perfect as that marked off by the Metronome itself.

Purchasers of Victrolas, in addition to the best operatic numbers, standard selections, ballads, etc., should not forget South American airs with their irresistible tang. Your friends will surely want to hear

Diamonds for Marbles An Irish peddler whose business it was to supply the wives of Dutch farmers in South Africa with small odds and ends such as needles, thread, tape, buttons and so forth, crowned himself with honor by inadvertently discovering the richest diamond field known.

Staying overnight at a farm house he noticed the children of the farmer playing with, what to him, were strange looking pebbles. He asked the farmer's wife if he could take one or two of them along with him as a keep sake. She finformed him to take them all if he wanted to, as there were plenty more in the brook beside the house. The peddler took the stones to an assayer—and the morning after a new era had begun for South Africa.

Diamonds represent value in stones, but, there is no doubt that good, clean, fresh food supplies are more valuable to the housewife on whom the responsibility rests for the continued good health

RENOVATING WASHINGTON.

A bill has passed both branches of Congress which abolishes alley slums in the national capital. This will put an end to alumming parties there unless the poor devilla who are run out of their holes now do a little slumming on Congress and society.

YOU light a cigar and in thirty minutes he interest on two hard-working dollars for a whole year has gone up in smoke. Then you lie awake at night with nerves condering why you do not get rich and dedding that luck is against you.

It is definite that Mrs. Davidson will the ticket for State Superintendent of Instruction. At the primaries many voted for her regardless of politics

California refuses to be unhappy be-cause Wisconsin got the first swat at the straggling remnants of Progressivism. La follette was just as obnoxious as Johnson and of much more importance. Wisconsin administered the death blow; but California can still be in at the funeral.

Noboby knows.

In all probability the war will end without anybody having the least idea as to whether Servia or Austria came out victorious. The war for them seems to have amounted to a dos-fall with nobody really caring what does happen. They were not really principals in this trouble, but only excuses for the rest.

HE REST RIND.

It would be good if wars could be deded by strategy in the same way that sham
ttles are determined. Under such cirmatances the opposing armies could simrattempt to checkmate one another and
monstrate what could be done without
tually opening fire. The conclusion would
exactly the same, and the loss of life
uld be obviated.

STRATEGIC POINT.

Los Angeles will heartily approve of a plan to have all interests co-operate for peneral success of both California excitions. This city must naturally remain strail oversile to the control of the city must naturally remain.

The discontented elements in Europe appear to have forgotten their dissensions in the face of the impending peril and they are all for their home governments. When a policeman bests a husband for cruelty to the wife he finds that she is on his back

The complaint that Turkey is objecting to the flippant way in which she is being treated by the American newspapers is not likely to grow into an international incident. Why do the Turks act so funny if they don't want to be held up to ridicule and sometimes public execution?

The war has shown us that many of the alleged foreign-made goods are manufactured on this side of the water. In other words, that a bit of red paint and gold leaf do not mean necessarily that they are of foreign manufacture. It has served to tear the mask from the faces of a let of the served to the mask from the faces of a let of the served to the s mask from the faces of a lot of preanders. Russian caviar comes from Dela-ware, the most of the alleged foreign cheeses

OVERSEAS—THE SITUATION TO DATE.

Overseas the battle of the Marne is about over, but the European war is just beginning. Such is the formula of the news from abroad last night. At the same time, Secretary of State Bryan yesterday signed with representatives of Spain, France, China and England truatice between those countries and the United States to substitute syllables for sabers and words for weapons in case of any falling out between sood friends in the future. For a whole year they are to discuss the matter, in the event any of the countries named come to odds with the United States, before resorting to arms. By that time, it is presumed, the prospective foes would have little energy left to fight. The parallel is the saucy letter one writes to someone who has offended. He sleeps over it and the next day he burns the letter and all is well that ends will. Though the present European war is not ending that way, great stress is laid by the Washington dispatches on the conclusion of the treaties and the hint is dropped that on the reply of the Kaiser to official inquiries directed by Fresident Wilson may depend the fate of war or peace.

war or peace.

To return to the war itself, the indications seem to be that, while the Germans have been severely punished in their retreat from Paris, they are taking up positions to stay the northward advance of the French and English allies. The Germans are said to be maintaining cohesion, and unless the French succeed in their attempt to wedge themselves between the army of the Crown Prince and the armies operating to the west of him, the Kaiser's forces will present a solid front.

From the other side of Germany comes word that some disculstude prevails in Russia over the snail-like performances of the Russian armies. They do not seem to be nearly so well off as the imagination has pictured them, and at the same time Berlin reports a victory of the Austrians over the Serbs. The Roumanians are now represented to be clamoring for closer relation with the Triple Entents rather than with the Triple Alliance, and while the Italians are warming up to the same subject, the Rallian government is maintaining the very strictest neutrality. Turkey is quiet, harassed as the Porte probably is by the fear that the upshot of the whole business may be an alliance between Germany and Russia to grab Constantinople.

HIRAM, THE HUMBUG.

Hiram W. Johnson draws on his imagination for his facts, ascribes to his opponents deeds that they never perpetrated, places in their mouths words that they never uttered, builds fortresses that were never garrisoned, and then, with his lurid and unscrupulous rhetoric; proceeds to demolish these phantoms of a brain crazed with the heat of a conscienceless and utterly unwarranted ambition.

Against the Republican party, which four years ago was misled into placing him in power, and against the men who generously attributed to him qualities of honor and truthfulness and fairness which he never possessed. Mr. Johnson says that if he is defeated and a Republican Legislature elected the Public Utilities Commission will be destroyed. That commission was created by the Republican party five years ago, three tyears before the mad desire of Theodore Roosevelt for a third term as President and that of Johnson for the Vice-Presidential chair had created the Progressive party—three years before these traitors coined the name of Progressive and used it to treach erously stab with the dagger of Joab the cause that they were unable to smite with the sword of the Philistines.

Mr. Johnson claims that the full-train-crew law was a "Progressive" measure. On the original state of Yuba Dam.

The mania for goods with foreign labels, for imported wines, tobacco, clothes, fashions, manners and artistic "finish" will get a severe setback as one result of the European war. We have been cut off from a base of supply that for sentimental, not to say snobbish, reasons we have made a great deal too much of in the past.

Boynton—a Republican—and passed more than a year before the Progressive party was ever heard of.

The Juvenile Court law was passed in 1904; the child labor law was passed in 1907, and the law making State taxes payable by public services corporations was passed in 1909. Mr. Johnson claims for the "Progressive" party credit for all these measures, although they were passed from three to eight years before the "Progressive" party came into being. When the woman's suffrage amendment to the Constitution was pending Mr. Johnson was possed by a dumb devil. Now he brazenly asserts that the emancipation of woman is largely, if not entirely, due to his efforts. His impudent efforts to obtain office under the false pretense of being the author of laws which were enacted when he was a private citizen is only equaled by his stuborn silence and neglect to explain some acts of his which go to show his unfitness for re-election to the Governorship which has held and used as a private possession rather than as a public trust.

The Times has mentioned some of these matters before. It will refer to them again. It will suggest that Mr. Johnson explain, not by calling the principal proprietor of the war. To a certain extent it is an time than a set of the public trust.

For many years the education abroad idea
has been given an undeserved prominence.

It is not improbable that the Hon. Hiram W. Johnson, who has announced that in this campaign he will neither ask nor give quarter, will reply to these questions as did the Irishman who was indicted for stealing a American art and give it an individuality. We are no nation of parrots. At the same time we appreciate the height art has been lifted to in the schools of older countries. We may never reach their standard. What is really important is to set a standard of our own and gradually elevate it. Let us at least work out our artistic salvation or damnation, as the case may be, in our own way and according to our own traditions. It's foolish to pay more for the label than

In certain circles the idea that we are proving our superior taste by buying foreign wines or clothes, or paying for a European "finish," will doubtless die hard. But it will die, and "made and finished in America" will be the sign by which to conquer.

The Times hard names, but by answering the following questions:

When you were a lobbyist for the Southers and talking too much?

Did you earn the money that Rudolph by Prancisco grafters, or did you, through sheer incompetency, fail to land but one of them in the penitentilary when you should have secured the conviction of half a dozen?

Are you still af opinion that your necessity "to eat" justified you in sharing with Daizell Brown the money he stole from the poor people who deposited their savings with him?

Do you approve of your action in the southers and seize it—to prove that in America we can turn out just as good trained material in the so-called higher branches of education as any bearing the trade-mark of litaly, France or Germany.

Our children are home made. Our drama, literature, opera, pictures and "finish" can be the same. Cut off for three years the possibility of denaturizing our native talent in foreign schools and we will prove conclusively that on the ideal as well as on the poor people who deposited their savings has taken so strong a hold of our native last the same with him? cation as any bearing the trade-mark of Italy, France or Germany.

Our children are home made. Our drama, literature, opera, pictures and "finish" can be the same. Cut off for three years the possibility of denaturizing our native talent in foreign schools and we will prove conclusively that on the ideal as well as on the practical side American education is the best. Hitherto the idea of a European finish has taken so strong a hold of our native artists that American talent has had no chance unless covered with a foreign veneer.

But since the talent was born in America why should it have to be transplanted to foreign seil to attain its full growth? It is bad enough and uneconomical enough to ship our fine California wines to France and Portugal and Italy that they may sell at exorbitant prices in New York and Philadelphia under a plaster of labels in some outlandish tongue. But it is worse economy to ship our native talent to foreign countries

light, entrancing, beguiling, is with us to-night. September the pleasant, of generous night. September the pleasant, of generous fame, is answering "Present!" when called is her name. September's the guerdon for all we have borne, the heat and the burden that made our hearts mourn. She pays for the grilling we got in July; she says. "I am willing your teardrops to dry; come rest on my bosom, and if you have fears, I'll see that you lose 'em, my own stricken dears!" She pays for the glaring of midsummer skies, the sweating, the sweating, the besties and files; the pains and the rigors of long August days, the fleas and the chigger—ah, nobly she pays! Her breezes caresing already have cheered; no hot winds distressing are scorching my beard; her rights come accreeping from some cooler clime, and man, in his sleeping, makes up for lost time. The meadows are solden, the heavens are blue, the year is unfoldin' its blessings to you. You cease to remember the troubles you've known, since gentle September comes into her own.

Queenly Liberality.

THE DAY'S RECKONING. BY EUGENE BROWN.

The Red King. There was a little man who had a little and his bullets were made of lead—But it seemed the strangest thing: He was fighting for a king.

To whom all things looked red.

So he fought and he shot till his arm grew

weak,
And the blood in his veins ran cold;
For alas! the only one
That his reason ever knew
Was to do as the red king told.

The Fire Kindled. On the same day that young Fritzle Hapsburg lost a pair of skates through the ice little Pietro Karageorge, who lived in the other half of the same house, stuck his head over the back porch and grinned.

"You're making faces at me," sniffled Pritzle.

Fritzie.

"Ain't neither," said Pietro.

"You stuck your tongue out at me, an I'll siap your mouth," returned Fritzie.

"You just try it and I'll tell my cousin Ivan Romanoff," retorted Pietro.

"Bah! I ain't afraid. My big stepbrother, Karl Hobenzollern can lick the stuffing out of him," said Fritzie.

"Can."

"Can."
"What you fellers fussin' about, anyhow?"
suddenly asked little Alphonse Crapaud,
who lived on the other side.
"He stuck out his tongue at me," complained Fritzie.
"That's nothing," rotorted Alphonse, "I
can do that myself."
"Who's that talking about me?" inquired
a hoarse voice sounding from across the alley. It was ugly Ivan Romanoff, suffering
from a bad cold.
"Fritzie says Karl can lick you," explained
little Pietro.

rrom a bad cold.

"Fritzle says Karl can lick you," explained little Pletro.

"He stuck his tongue out at me first," whimpered Fritzle, pointing at Pietro.

"What do we care? Here goes mine, too—and mine goes double," exclaimed Ivan.

"Is that so?" suddenly interrupted the strident voice of blustry Karl from the street in front. "You stick your tongue out at me and I'll bite it off and feed it to my pup"—and he started for the gate.

"You keep out of my yard," shrieked Alphonse, picking up a stone. Whereupon Karl started across the next lot where little libert Flanders was weeding in the garden. "Don't you walk on my onions," shouted libert, in remonstrance.

"Aw! shut up," said Karl, savagely, siapping little Albert in the face and knocking him over.

"Help!" wailed Albert, clinging desperately to Karl's leg and impeding his precedent.

him over.

"Help!" wailed Albert, clinging desperately to Karl's leg and impeding his progress. Karl's leg and impeding his progress. Karl was trying energetically to shake himself free when the shrill voice of Tommy Atkins was heard from across the street:

"Wot's all this bloomin' row? Let that little fellow alone, you big bloke."

"Make him leggo, then," snarled Karl.

"You got no business' in his yard," insisted Tommy.

"I was after Alphonse," explained Karl.

"After me, my dear Karl," exclaimed Tommy, sarcastically. "What's the matter with Alphonse?"

Tommy, sarcastically. "What's the matter with Alphonse?"

"He stuck out his tongue at Fritzie," replied Karl, savagely.

"Aw! what of it? Here goes another."

answered Tommy, sulting the action to the word.

"He said Ivan could lick me," persisted Karl, now pointing at little Pietro.

"That's nothing," interrupted Tommy. "If he can't, I can."

"Can't!"

"Liar!"

"Another!"

As the combat raged Uncle Sam drove down the road in his side-bar buggy. He was smoking a cheroot and cracking his whip. "Great Scott!" he exclaimed as he drew up at the curbing. "What's the matter, bury?"

drew up at the curbing. "What's the matter, boys?"

Fritxle struggled up from the bottom of the pile with his mouth full of Ivan's hair.

"He stuck his tongue out at me," he exclaimed, peinting at Fietro.

"He stuck his tongue out at me," said Karl, suddenly, pointing at Tommy Atkins.

"He stuck his tongue out first," said Alphonse Crapaud, wiping the blood from his mose, and pointing at Fritzle.

"He said Karl could lick me," said Ivan, pointing at Fritzle.

"He made faces at little Albert," said Tommy Atkins, pointing at Karl.

"I didn't see it," whimpered little Garibaldi.

"Shate bands and

"Shake hands and go home, boys," said Uncle Sam, sadly. "It ain't worth while." Meanwhile what has become of the swarm that used to fill the bleachers, shriekingly praying for Cap to wallop the bead for a couple of pillows?

They are hanging around the bulletin boards downtown trying to keep track of the quarrie of the bad boys who stuck out their tongues at one another at a leader's behest.

American Motor Population. [Scientific American:] According to the latest authentic figures there are now in the United States 1,548,350 motor cars. The figure includes both gasoline and electric vehicles for both pleasure and commercial vehicles for both pleasure and commercial purposes. This figure is the total registration up to July 1 only, so that by the end of the year it undoubtedly will be considerably larger. The registrations for the three previous years are as follows: Nineteen hundred and thirteen, 1,253,875 registered; 1912, 1,010,483 registered; 1911, 677,000 registered. As might be expected, New York State leads with a total registration of 140,663 cars. Nevada is last with 1265 cars registered.

claims. We have had since January 7 nearly 5000 applications for help in civil cases, to be exact there were 4945 applications. At least half of them are people who come in for advice on different matters. A great many are domestic relations. This feature is the most numerous. Women do not know their rights and especially in connection with their children, many applications have to do with rents and many landlords come to us for advice in connection with their tenants. The law does not authorize us to go into the divorce court or to eject tenants. I have engaged the aid of the Bar Association to handle this class of business. Many lawyers have time and are willing to help in this work. I have asked the bar to help and I have a list of lawyers. When a case comes to me that is not under my jurisdiction, I refer to this list.

Q.: And it is your duty to prosecute all claims under the sum of \$100 for poor people?

A.: The law is very carefully worded: "He shall also, upon request, prosecute actions for the collections of wages and other demands for persons who cannot employ counsel in cases not exceeding \$100."

Q.: Your interpretation is that you should represent poor people in cases running up to \$100. What do you consider a typical case of harassment?

A.: The most common is the unscrupulous collection agency which attaches or issues a garnishment upon men's wages where they know they have no right; where men will lose their positions and they will harass them in this manner and try to make them use extra efforts. In cases of that kind we step in.

Q.: In loan cases where exorbitant interest is charged?

A.: We have been the means of forestalling much oppression of the loan sharks. Two per cent. per month is the maximum and we have many cases of this kind and many of thein get to court and in many instances we go to the shark and make him comply with the law.

State Labor Department.
Commissioner Garretson: Senator, in your capacity as inspector of the Labor Department have you had any occasion to take action against any large employers of labor in the vicinity in regard to violation of either the safety or sanitation laws?

Q: Ordinarily the attitude of organized labor is to refrain from violence, is it not so? That is as I understand it. But we all know there have been many instances where violence has been committed. Do you know of any cases where organized labor has penalized such of its members as were guilty of violence in labor troubles?

A: That is, you mean to say that where someone has been arrested and found guilty under the law as it now stands, where organized labor has condemned the men—is that what you mean?

A.: No, I do not know of any. The reason is this, if we were to condemn men who are found guilty under the present law it would mean in many instances that we were condemning men who are altogether innocent.

of violence? Men such as Ryan, who was re-elected to a post of bonor after being convicted and who holds his office, I know, despite the fact that he is serving his sentence?

A: Have you read the transcript of evidence taken at that trial?

Q: No, I have not read it.

A: If you will read that transcript you will plainly see that no union men reading that transcript could ever be made to believe that Ryan was guilty. No trial in Russia was ever conducted in so base a manner; it was an abomination unto the Lord and to the devil. The men back of Ryan didn't believe him guilty, some think he was and oppose him, I suppose. I suppose the condition that produced the attitude in the minds of the McNamara boys were the same and was so for others, but not enough to make it the policy of the organization. Those men have thought that Ryan was unjustly convicted and have stood by him.

Q: The answer then is that in the case of that particular individual, Ryan, organized labor looks upon him as unjustly convicted.

VIOLENCE CONDONED.
Continuation of testimony of Job Harriman.
Commissioner Weinstock: Does organized labor regard violence as justifiable?
A.: Well, that depends upon the circumstances, I suppose, under which the act might be committed, but as an organization I think they have an organization I think they have not indorsed violence at all. My opinion and experience is that they have found that they can gain their ends better by peaceful methods than by violent methods, and the reason for the courts will co-operate to punish an innocent man?
A.: I do not know whether they will from the top to the bottom, I believe they will half way up. I mean that in all respect. I wish to make this point on that; that probably you could find many judges in the higher courts who would be perfectly fair if their fundamental premise was not attached. We must observe this in these trials that the judges of the courts reason from a different premise from the men in the labor struggle. Act of our laws are jounded upon the rights of property because they believe that—those in power believe that by reason of property their liberties are best preserved. Commissioner Garretson:

W. Herriman. I will co-operate to punish an innocent man?

A: I do not know whether they will from the top to the bottom, I believe they will half way up. I mean that in all respect. I wish to make this point on that; that probably you could find many judges in the higher courts who would be perfectly fair if their fundamental premise was not attached. We must observe this in these trials that the judges of the courts reason from a different premise from the men in the labor struggle.

Act well, that depends upon the circumstances, I suppose, under which if their fundamental premise was not attached. We must observe this in the courts who would be perfectly fair fitheir fundamental premise was not attached. We must observe the suppose in the lieve they wi

MURDER AND RAPINE.

MURDER AND RAPINE.
Testimony of Frank E. Wolfe.
Chairman Walsh: Proceed.
Wolfe: On April 25 the Chef of Police of Los Angeles asked for an appropriation to buy forty guns to add to this armed camp that we maintain there. Why, this State is so well dispersion of labor, passed a law to make it permissible to make every high school which has forty pupils in this State an armed military camp, to provide them with Krag-Jorgensen guns, with ball and cartridge, and this was taken advantage of all over the State. They have here more different kinds of arsenals and armed camps than you would dream of.
They have armed camps right in the Y.M.C.A., the president of which testified on this stand yesterday, or Friday, I believe it was, he was then president of the Y.M.C.A., and owner of one of the big department stores in this city. I saw in the Y.M.C.A. great rows of lockers, and when they were thrown open it was filled with Sprinfield rifles and bayonets, one of the most deadly weapons ever designed by murderous man.
By your permission, Mr. Chairman, if I may stand up here. (The waitness leaps from the witness stand to the stage and stands beside the members of the Commission, with his back to the audience.)
This is one of the sawed-off shot-

bers of the Commission, with his back to the audience.)

This is one of the sawed-off shot-guns recently bought by the City Council, which we of the laboring class believe, and we think we have reason to believe, will go into the hands of Baldwin-Felts or Burns or other private gunmen of capitalism in case of a labor struggle in this city. (The witness holds the gun at arm's length, swings the same about, exhibiting it to the Commission and to the audience.)

iting it to the Commission and to the audience.)

The operation of this gun is very simple. (The witness operates the reloading mechanism.) Loaded with twenty-one No. 1 buckshot, at a distance, we will say, of sixty feet, about the width of the city streets, I would assume that within one second a good, handy Burns thug could kill or wound twenty-five or thirty, at least, men and

women and babies, because these peo-ple don't draw the line.

With your permission I will show you how rapidly it may be operated. (The witness goes through the mo-tions of rapidly firing and reloading and firing the gun, operating the re-loading mechanism many times, all within the space of a few seconds.) It will make twenty-five within that time. This end of the gun (indicat-ing the muzzle) is designed for the working class; this (indicating the stock) for the capitalist class.

LITTLE GIRD ACCUSER.

E. S. Ferris, 45 years of age, was held to answer on a serious charge preferred by Caroline Wagner, 13 years old, in Justice Forbes's cour yesterday. The little girl testified that owned by her mother. He was seen girl a few days after the alleged crime. The police were called and Ferris was arrested after a chase. He subsequently escaped and was recaptured. Ferris was lodged in jail in default of \$1000 bail.

Gray Hair Restored By Natural Means

Don't Use Dyes. They May Harm Let the Action of Air Bring Back Natural Color.

Those gray strands that streak your hair and all too convincingly remind your friends of your advancing years, will positively and surely yield to the gentile, harmless, restoring influence of Hay's Hair Health. You simply moisten the hair with this wonderfully effective preparation and the natural color begins at once to come back.

Hay's Hair Health is not a dye—it restores color by NATURAL FORCES. It contains good old-fashioned remedies which strengthen, upbuild and revitalize the hair, and with them is an element which so prepares the hair that when it is exposed to AIR it comes back to the color that nature intended.

You don't have to use deleterious and destroying drugs—you can let so harmless and wholesome a thing as the AIR YOU BREATHE help you to get rid of gray hairs you now have and KEEP OTHERS FROM COMING IN.

No matter how gray you may have used, begin at once using the NATURAL restorative—Hay's Hair Health. It routs dandruff, freshens dull, lifeless hair. It makes the hair YOUNG looking, brings back its luster, softness and luxuriance. It it fails, drugsjet will refund price.

It was explained by members of the board in connection with the statement regarding the company's "turning to its own advantage the widespread prejudice among its consumers," that this could be done in the case of an election on the water question. It was stated that the public, in its anxiety to secure the municipal water service, might be misled into believing that the city is endeavoring to ayoid furnishing the service, and vote to have it take over the Union Hollywood system at an arbitrary price.

and vote to have it take over the Union Hollywood system at an arbitrary price.

The city's purpose, according to members of the board, is to proceed with the least possible delay to serve the people of Hollywood and others in the western part of the city under the Hollywood company's main with city water. The chief engineer is preparing an estimate of the cost of the new system, and at the same time an estimate of the cost of extending and rebuilding the present system, provided the city shall acquire it. It is the belief of Chief Engineer Mulholland that the cost of the system, whether or not the Hollywood company's lines are acquired, will be about the same. The board has no intention of paying the Hollywood company a higher price for its plant, according to the members.

Early this month the Hollywood company definitely refused the city's offer of \$470.452 for the present plant and renewed its proposal that the difference as to price be left to the State Railroad Commission.

FOR DRIVERS.

As soon as the official pathfinder returns, a number of drivers are to go out on the course on their preliminary runs. Until this time, entrants have been unable to prepare for the race as they did not know which course was to be covered and it all depends on the course as to how the cars are prepared for the asvere strain.

If the Needles route is selected, there will be a large purse assured for the race, but as sportsmanship has always been the one big element in the Phoenix race, the purse will make little difference to the majority of entrants and the lists will be larger than ever regardless of what course the cars are to cover.

Boles scorificed him to second. Love, batting for himself, was thrown out by Guest, Page pushing along to third. This brought Wolter up to the bingle bin. Klawitter sent up a wide one. Plainly it was his intention to sidestep the issue by passing the kink. Dutch, issue by passing the confident that Wolter would giadly accept the gift, did not throw the next one up quite so wide, but it was several inches on the outside of the plate. Wolter reached over, half threw his bat at the ball, caught it near the end of the implement and sent it spinning between third base and Gasoline Gus, who was almost as surprised as Klawitter. It was a clean hit and Page came across with the deciding ace.

The Freshies.

To be frank, the freshman squad of yesterday did not look promising. But there was a reason for that. The sophomores had a meeting yesterday and it so terrified the freshmen that they postponed their meeting until today. Only a few showed up. Many who have been out did not turn up and many men with prep pedigrees decided it was safer to wait a day.

Oldsmobile 1285 **NEW LIGHT FOUR**

For the last two years there has been an increasing and insistent call for a smaller, lighter Oldsmobile, built with the characteristic completeness and refinement of the famous "Big Six." We immediately prepared to meet this demand—but not hastily, for we knew the market would be ready as soon as we were—but step by step, seeking the type of car that would fill this demand, not for one season but for many seasons to come.

The new Oldsmobile Light Four is here—now ready for your inspection.

True Oldsmobile

You will find the exact replica of the "greatest six-cylinder car in America" in this Light Four. It has all the beautiful lines and harmonious proportions that mark the big Oldsmobile, the only practical difference being in its wheelbase reduced to 112 inches, and the consequent reduction in weight.

Handsome Raymond Gallagher, a popular young leading man of the Universal Film Company, is wearing "the smile that won't come off" these days, and the reason is a dainty little Miss West from the East. Nobody aside from the two people concerned seems to know just when "it" will come off, but the formal announcement is expected within a few days.

"The Devil's Dansant" is the fea-ture of a recent Kalem film story. The dansant pictures all the latest Broad-way dances, and is to be shown in this city in the near future.

"Burning Daylight," the film version of one of Jack London's most fascinating stories, will be shown at the Athletic Club to invited guests this week. The nicture was made in the snow near Truckee last winter. As Harnish, the prospector, Hobart Bosworth is said to have done some of his best work.

Gleveland Plain Dealer: A silver plate taking the place of several ribs in the body of Charles Feathers of Altoons, Pa., a Pennsylvania brakeman, attracted a bolt of lightning in a fierce storm here.

Feathers's throat is completely paralyzed and his daws are firmly locked, although he is perfectly conscious and suffers no pain.

The trainman was standing on his porch and near him was his son. The bolt struck between the two, but the boy was uninjured, while Feathers was knocked down. The bolt loosened the silver plate in Feathers's side. The physicians believe he will recover.

In 1863 he made his escape from his master and joined the United States Navy. He served as a steward in the navy until the end of the Civil War. Immediately after his emancipation he entered the schools of the Baptist Home Mission Society at Louisville, and by diligent application to his books, acquired a good practical education. He also studied theology and served during the early part of his life as both preacher and teacher.

In 1836, while pastor of the Union Baptist Church in Cincinnati, he was appointed by President Cleveland to the position of chaplain in the regular army, and served until four years ago, when he was retired. He served as executive secretary to Dr. Barrows in connection with the Parliament of Religions at the Columbia Exposition at Chicago in 1893.

Upon his retirement from the army he established a colony in the San Joaquin Valley for the purpose of giving the negroes an opportunity to experiment in self-government, and he himself took residence in the colony, though at a considerable sacrifice to himself and family.

bility of amending the ordinance as proposed.

The said two officials have stated that the ordinance in its present form meets all the requirements as to the protection of life and property, and also stated that it was impossible for a fire to get outside of the booth of any motion-picture theater as long as they compiled with the provisions of the ordinance on this subject matter.

As to the changing of the age limit, it is the consensus of opinion of both your committee and the owners of motion-picture theaters that a young man of from 18 to 20 years of age is just as efficient as a man from 21 to 30 in this line of work.

As above stated, this committee has listened to arguments both for and against the proposed ordinance, and at a public hearing before the committee.

Isseed to arguments both for and against the proposed ordinance, and at a public hearing before the committee an opportunity as special properties to an opportunity as a proposed ordinance, and at a public hearing before the committee an opportunity as a proposed ordinance, and are seen to the committee of the motion-picture theaters to be heard upon this amblect, and we have a proposed be not considered by the Council and that the same be filed; and we further recommend that the first office answers on the ground that the proposed by the Council and that the same be filed; and we further recommend that the first office answers on the ground that they were never acreed notice when the operators and the operators and the operators and the operators.
